

Paper ID	Paper Title
9	Zero-Shot Image Retrieval with Human Feedback
14	Automatic Diffusion-Based Social Media Video Generation for Mobile Devices from Text
15	Open-RoadAtlas: Leveraging VLMs for Road Condition Survey with Real-Time Mobile Auditing
17	360RVW: Fusing Real 360° Videos and Interactive Virtual Worlds
20	BranchClash: A Fully On-Chain Tower Defense Blockchain Game with New Collaboration Mechanism
31	Personalized Content Recommender System via Non-verbal Interaction Using Face Mesh and Facial Expression
2	SetterVision: Motion-based Tactical Training System for Volleyball Setters in Virtual Reality
25	Development of an Online Marathon System using Acoustic AR
42	Reference-based dense pose estimation via Partial 3D Point Cloud Matching
11	Multimodal Emotion Interaction and Visualization Platform
26	CFTF: Controllable Fine-grained Text2Face and Its Human-in-the-loop Suspect Portraits Application
34	IFS-SED: Incremental Few-Shot Sound Event Detection Using Explicit Learning and Calibration
3	HumVis: Human-Centric Visual Analysis System
27	HoloSinger: Semantics and Music Driven Motion Generation with Octahedral Holographic Projection
39	ALDA: An Adaptive Layout Design Assistant for diverse posters throughout the design process
43	EditAnything: Empowering Unparalleled Flexibility in Image Editing and Generation
10	mPLUG-Octopus: The Versatile Assistant Empowered by A Modularized End-to-End Multimodal LLM
16	H2V4Sports: Real-Time Horizontal-to-Vertical Video Converter for Sports Lives via Fast Object Detection and Pose Estimation
41	3D Creation at Your Fingertips: From Text or Image to 3D Assets
